International Anti-Corruption Norms Jun 18 2021 The creation of international anti-corruption norms through non-binding instruments and informal institutions can privilege the interests of powerful states and raise questions about the legitimacy of these institutions and the instruments they produce. At the same time, the anti-corruption instruments created under the auspices of these institutions also show that non-binding instruments and informal institutions carry significant advantages. The non-binding instruments in the anti-corruption field have a clear capacity to influence domestic legal systems that is comparable to, if not greater than, that of binding treaties. This book examines the creation of international anti-corruption norms by states and other actors through four markedly different institutions: the Organisation for Economic Co-operation and Development, the United Nations, the Extractive Industries Transparency Initiative, and the Financial Action Task Force. Each of these institutions oversees an international instrument that requires states to combat corruption - yet only the United Nations oversees anti-corruption norms that take the role of a binding multilateral treaty. The OECD has, by contrast, fostered the development of the binding 1997 OECD Anti-Bribery Convention, as well as non-binding recommendations and guidance associated with treaty itself. In addition, the revenue laundering and anti-money laundering norms developed through the Extractive Industries Transparency Initiative and the Financial Action Task Force, respectively, take the form of the non-binding instruments that have no relationship with multilateral treaties. With corruption at the forefront of political debate, International Anti-Corruption Norms provides timely guidance on the burgeoning debate surrounding international finance and natural resources extraction, as well as other forms of modern-day corruption, and the most effective methods of tackling these global political issues.

Flinders Aluminum Fabrication Corporation v. Mismo Fire Insurance Company Oct 03 2022 Flinders Aluminum Fabrication Corporation burned to the ground on the night of November 16. George Avery, an employee of the plant, died inside. Plaintiff Jackson, the sole stockholder of the company, has filed a civil action lawsuit to recover damages owed from the policy issued by defendant Mismo Fire Insurance Company. The defendant has refused to pay, claiming that the fire was the work of an arsonist, thus indicating deliberate fraud. Mismo asserts that Jackson conspired with others to burn the plant in order to collect what was promised in the insurance policy. This breach-of-contract case file has four witnesses for both the plaintiff and the defendant. Videos of the fire, deposition statements, and a PowerPoint presentation are included as free downloads. A companion criminal case file, *State v. Jackson*, involves the charge of arson against Arthur Jackson. Both case files are NITA classics that have been updated in 2017. Read more about the case files in this interview with two of their authors.

Texas Rules of Evidence Manual - Tenth Edition Nov 23 2021 Texas Rules of Evidence Manual provides an updated comprehensive reference to Texas evidence for both civil and criminal cases. The book provides a rule-by-rule analysis of each Rule of Evidence. This sturdy hard-cover text is designed for heavy use in the courtroom. This text helps those who are bound to use the Texas Rules of Evidence, whether it is the bench or the bar or those studying evidence. While the text contains some academic discussions, the book is designed to explain what a particular Rule requires or prohibits, to indicate what the appellate courts have said about the Rules, and to offer some practical pointers on using the Rules. The book itself has been designed to make it as useful as possible to the harried judge, counsel, and student who must quickly find the "law." Following each Rule is an editorial commentary on the Rule explaining how the Rule works, what the Texas courts have said about the Rule, and how it compares with the Federal Rule, because Texas courts often review federal precedent where they find it helpful in applying a Texas Rule. When appropriate, practical pointers are also provided on how to use the Rule. Where the Rules apply in the same fashion for both civil and criminal cases, those points are discussed together. On the other hand, where they diverge, the authors have used separate headings for "Civil" and "Criminal" when that seems appropriate. One of the objectives of the Editorial Analysis in this text is to deal with the interrelationships of the various Rules. The authors have noted those areas where the Rules differ from pre-Rules case law or statutory provisions. Some of the Rules changed the prior Texas evidence law and, although many of the Texas Rules agree with the Federal Rules, a number differ significantly.

Day of Deceit Oct 30 2019 Pearl Harbor was not an accident, a mere failure of American intelligence, or a brilliant Japanese military coup. It was the result of a carefully orchestrated design, initiated at the highest levels of our government. According to a key memorandum eight steps were taken to make sure we would enter the war by this means. Pearl Harbor was the only way, leading officials felt, to galvanize the reluctant American public into action. This great question of Pearl Harbor--what did we know and when did we know it?--has been argued for years. At first, a panel created by FDR concluded that we had no advance warning and should blame only the local commanders for lack of preparedness. More recently, historians such as John Toland and Edward Beach have concluded that some intelligence was intercepted. Finally, just months ago, the Senate voted to exonerate Hawaii commanders Admiral Kimmel and Lieutenant General Short, after the Pentagon officially declared that blame should be "broadly shared." But no investigator has ever been able to prove that fore-knowledge of the attack existed at the highest levels. Until now. After decades of Freedom of Information Act requests, Robert B. Stinnett has gathered the long-hidden evidence that shatters every shibboleth of Pearl Harbor. It shows that not only was the attack expected, it was deliberately provoked through an eight-step program devised by the Navy. Whereas previous investigators have claimed that our government did not crack Japan's military codes before December 7, 1941, Stinnett offers cable after cable of decryptions. He proves that a Japanese spy on the island transmitted information--including a map of bombing targets--beginning on August 21, and that government intelligence knew all about it. He reveals that Admiral Kimmel was prevented from conducting a routine training exercise at the eleventh hour that would have uncovered the location of the oncoming Japanese fleet. And contrary to previous claims, he shows that the Japanese fleet did not maintain radio silence as it approached Hawaii. Its many coded cables were intercepted and decoded by American cryptographers in Stations on Hawaii and in Seattle. The evidence is overwhelming. At the highest levels--on FDR's desk--America had ample warning of the pending attack. At those same levels, it was understood that the isolationist American public would not support a declaration of war unless we were attacked first. The result was a plan to anger Japan, to keep the loyal officers responsible for Pearl Harbor in the dark, and thus to drag America into the greatest war of her existence. Yet even having found what he calls the "terrible truth," Stinnett is still inclined to forgive. "I sympathize with the agonizing dilemma faced by President Roosevelt," he writes. "He was forced to find circuitous means to persuade an isolationist America to join in a fight for freedom....It is easier to take a critical view of this policy a half century removed than to understand fully what went on in Roosevelt's mind in the year prior to Pearl Harbor." Day of Deceit is the definitive final chapter on America's greatest secret and our worst military disaster.
