The Doctors Blackwell: How Two Pioneering Sisters Brought Medicine to Women and Women to Medicine Nov 29 2019 New York Times Bestseller Finalist for the 2022 Pulitzer Prize in Biography "Janice P. Nimura has resurrected Elizabeth and Emily Blackwell in all their feisty, thrilling, trailblazing splendor." —Stacy Schiff Elizabeth Blackwell believed from an early age that she was destined for a mission beyond the scope of "ordinary" womanhood. Though the world at first recoiled at the notion of a woman studying medicine, her intelligence and intensity ultimately won her the acceptance of the male medical establishment. In 1849, she became the first woman in America to receive an M.D. She was soon joined in her iconic achievement by her younger sister, Emily, who was actually the more brilliant physician. Exploring the sisters' allies, enemies, and enduring partnership, Janice P. Nimura presents a story of trial and triumph. Together, the Blackwells founded the New York Infirmary for Indigent Women and Children, the first hospital staffed entirely by women. Both sisters were tenacious and visionary, but their convictions did not always align with the emergence of women's rights—or with each other. From Bristol, Paris, and Edinburgh to the rising cities of antebellum America, this richly researched new biography celebrates two complicated pioneers who exploded the limits of possibility for women in medicine. As Elizabeth herself predicted, "a hundred years hence, women will not be what they are now."

Short Story Press Presents Not So Professional Feb 10 2021 Short Story Press Presents Not So Professional by Brandon Dowless Tub the ogre is tired. Tired of the unfounded stereotypes placed upon ogres by humans. They parade around his woods, hunting his prey and gathering his berries, all the while assuming that ogres are a bunch of stupid, ugly, smelly (okay, maybe that one's not “unfounded” per se) human-eaters. He also happens to be bored. Bored of the same menial tasks day in and day out; hunting prey and gathering berries to help feed the village until they move on to the next piece of land they stake for themselves. As we have found throughout history, being tired and bored is not an ideal state of mind for coming up with great decisions. And so, Tub comes up with a bad decision. Tub decides to become a hired killer for a mysterious contact. He believes that the life of a professional hit man will give him all the excitement found in his spy novels, while striking fear into the heart of the humans. Alas, Tub ends up a mere pawn in the hands of someone who doesn't have his best interests at heart. The ogre finds all the excitement he could ask for, and more, but will he survive? Or will his escapades be a mere footnote in time? Short Story Press publishes short stories written by everyday writers.

Career Stories Mar 26 2022 In *Career Stories*, Juliette Rogers considers a body of largely unexamined novels from the Belle & Époque that defy the usual categories allowed the female protagonist of the period. While most literary studies of the Belle & Époque (1880&-1914) focus on the conventional housewife or harlot distinction for female protagonists, the heroines investigated in *Career Stories* are professional lawyers, doctors, teachers, writers, archeologists, and scientists. In addition to the one well-known woman writer from the Belle & Époque, Colette, this study will expand our knowledge of relatively unknown authors, including Gabrielle Reval, Marcelle Tinayre, and Colette Yver, who actively participated in contemporary debates on women's possible roles in the public domain and in professional careers during this period. *Career Stories* seeks to understand early twentieth century France by examining novels written about professional women, bourgeois and working-class heroines, and the particular dilemmas that they faced. This book contributes a

new facet to literary histories of the Belle & Époque: a subgenre of the bildungsroman that flourished briefly during the first decade of the twentieth century in France. Rogers terms this subgenre the female berufsroman, or novel of women's professional development. Career Stories will change the way we think about the Belle & Époque and the interwar period in French literary history, because these women writers and their novels changed the direction that fiction writing would take in post-World War I France.

Using Story to Enrich Learning and Teaching Jan 24 2022 Story is everywhere in human lives and cultures and it features strongly in the processes of teaching and learning. Story can be called narrative, case study, critical incident, life history, anecdote, scenario, illustration or example, creative writing, storytelling; it is a unit of communication, it is in the products of the media industries, in therapy and in our daily acts of reflecting. Stories are 'told' in many ways - they are spoken, written, filmed, mimed or acted, presented as cartoons and in new media formats and through all these, they are associated with both teaching and learning processes but in different ways and at different levels. As a result of growing interest and simultaneous confusion about story, it is timely to untangle the various meanings of story so that we can draw out and extend its value and use. *Using Story* aims to clarify what we mean by story, to seek out where story occurs in education and life and to explore the processes by which we learn from story. In this way the book intends to 'bring story into the open' and improve its use. Building on her wealth of experience in the field, Jenny Moon explores the theory of story and demonstrates both its current uses and new ways in which to enrich and enliven teaching, learning and research processes. Ideal for anyone involved in education, personal or professional development or with a more general interest in story, the book begins by considering the range of what is meant by story, and then considers the theory behind the meanings. In the large final part of the book, Jenny provides a rich patchwork of different uses of story in education that cut across forms of story, story activities, disciplines and applications all of which will aid the use of story.

Practiceopolis: Stories from the Architectural Profession May 28 2022 This is a graphic novel about the contemporary architectural profession, in which it acts as the protagonist in the form of an imaginary city called Practiceopolis. The novel narrates quasi-realistic stories that exaggerate the architectural everyday and the tacit, in order to make them prominent and tangible. They depict and dramatise the value conflicts between the different cultures of practising architecture and between the architectural profession and other members of the building industry as political conflicts around the future of Practiceopolis. The book uses the metaphorical world of Practiceopolis to provoke big questions about everyday routines in the profession that practitioners may take for granted and to examine different ideologies at work among architects and other members of the construction industry. The novel ends in the tradition of dystopian worlds common in a certain strand of graphic novels. By vividly illustrating and narrating the critical issues he interrogates, the author has created a world which any architect, student or professional, will both instantly recognise and simultaneously reject, provoking the reader to challenge themselves and the profession at large.

The Profession Oct 01 2022 Master storyteller and bestselling author Steven Pressfield returns with a stunning, chillingly plausible near-future thriller about the rise of a privately financed and global military industrial complex. The year is 2032. The third Iran-Iraq war is over; the 11/11 dirty bomb attack on the port of Long Beach, California is receding into memory; Saudi Arabia has recently quelled a coup; Russians and Turks are clashing in the Caspian Basin; Iranian armored units, supported by the satellite and drone power of their Chinese allies, have emerged from their enclaves in Tehran and are sweeping south attempting to recapture the resource rich territory stolen from them, in their view, by Lukoil, BP, and ExxonMobil and their privately-funded armies. Everywhere, military force is for hire. Oil companies, multi-national corporations and banks employ powerful, cutting-edge mercenary armies to control global chaos and protect their riches. Even nation states enlist mercenary forces to suppress internal insurrections, hunt terrorists, and do the black bag jobs necessary to maintain the new New World Order. Force Insertion is the world's merc monopoly. Its leader is the disgraced former United States Marine General James Salter, stripped of his command by the president for nuclear saber-rattling with the Chinese and banished to the Far East. A grandmaster military and political strategist, Salter plans to take vengeance on those responsible for his exile and then come home...as Commander in Chief. The only man who can stop him is Gilbert "Gent" Gentilhomme, Salter's most loyal foot soldier, who launches a desperate mission to take out his mentor and save the United States from self destruction. Infused with a staggering breadth of research in military tactics and steeped in the timeless themes of the honor and valor of men at war that distinguish all of Pressfield's fiction, *The Profession* is that rare novel that informs and challenges the reader almost as much as it entertains.

There was only one problem--every card was stacked against her. Curveball tells the inspiring story of baseball's "female Jackie Robinson," a woman whose ambition, courage, and raw talent propelled her from ragtag teams barnstorming across the Dakotas to playing in front of large crowds at Yankee Stadium. Toni Stone was the first woman to play professional baseball on men's teams. After Robinson integrated the major leagues and other black players slowly began to follow, Stone seized an unprecedented opportunity to play professional baseball in the Negro League. She replaced Hank Aaron as the star infielder for the Indianapolis Clowns and later signed with the legendary Kansas City Monarchs. Playing alongside some of the premier athletes of all time including Ernie Banks, Willie Mays, Buck O'Neil, and Satchel Paige, Toni let her talent speak for itself. Curveball chronicles Toni Stone's remarkable career facing down not only fastballs, but jeers, sabotage, and Jim Crow America as well. Mr Churchill's Profession Aug 31 2022 In 1953, Winston Churchill received the Nobel Prize for Literature. In fact, Churchill was a professional writer before he was a politician, and published a stream of books and articles over the course of two intertwined careers. Now historian Peter Clarke traces the writing of the magisterial work that occupied Churchill for a quarter century, his four-volume *History of the English-Speaking Peoples*. As an author, Churchill faced woes familiar to many others; chronically short of funds, late on deadlines, scrambling to sell new projects or cajoling his publishers for more advance money. He signed a contract for the *English-Speaking* project in 1932, a time when his political career seemed over. The magnum opus was to be delivered in 1939, but in that year, history overtook history-writing. When the Nazis swept across Europe, Churchill was summoned from political exile to become Prime Minister. The *English-Speaking Peoples* would have to wait. The book would indeed be written and become a bestseller, after Churchill left public life. But even before he took office, the massive project was shaping his worldview, his speeches and his leadership. In these pages, Peter Clarke follows Churchill's monumental quest to chronicle the *English-Speaking Peoples* - a quest that helped to define the enduring 'special relationship' between Britain and America. In the process, Clarke gives us not just an untold chapter in literary history, but a fresh perspective on this iconic figure: a life of Churchill the author.

So Good They Can't Ignore You Mar 14 2021 In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

The Children of Vaughn: The Story of Professional Baseball in Portland, Oregon

(1901-2010) Nov 09 2020 This history of the Portland Beavers reads like a nightmare of economic failure in a field of dreams. The roots of baseball in Portland, Oregon go deep. In telling the story of baseball as it grew up before turning fallow in Portland, Terry Simons finds a balance between fact and fiction that is a sometimes humorous history, and a telling-truth about the way things once were, or could have been. Read this book, absorb its message and remember--the next time you go to bat against major-league pitching, you may strike out. A short (128 pp), concise history of professional baseball in Portland, Oregon, it tells the story of how Portland almost but not quite became a Major League Baseball town. When the game's demographics, politics and economics shifted Portland was left out in the cold. Portland never made it to the big leagues, but the story of how it almost got there is an entertaining and revealing portrait of the game as it evolved before television and the changing tides.--Buddy Dooley

The Quit Alternative Mar 02 2020 Here are the top 5 reasons this professional development book is a MUST READ:1) You can create the job you love without quitting your job and giving up your steady paycheck, 401(k), and insurance. This book shows you how. You won't find this information in traditional career guides. It is 100% possible for you, even if you've been considering how to quit your job or how to snag a job you love.2) You'll be entertained (and secretly educated). This book has been endorsed by 5 senior executive leaders of Fortune 1000 companies and 3 mail clerks.4) You'll discover a return on your investment to earn a car. Invest a few dollars and a little bit of time to read this book, and you'll pick up career development tips that can save you enough to earn a car (page 9).5) You'll have a "Personal Career Counselor in Your Pocket." It's useful and practical with vivid case studies for how to negotiate with the boss to help pay for your MBA or support a relocation to the city of your dreams. You'll also learn

how to deal with an unreasonable boss and even say "No" without getting fired.

A True Life Story Book Jun 16 2021 I am a Pilot by Profession and I am a Writer by Passion. A True Life Story Book contains over seventy thousand words and it took me over six months to write, edit and compile the stories into a book. I have survived death dozens of times. Most of my interviews with death was during my career as a Naval Pilot flying a helicopter mostly over the sea in all weather conditions by day and night for over three long decades. Often I wonder why am I still alive. I wrote this book I named "A True Life Story Book" containing stories starting from my childhood spanning over half a century of memories. There were far too many incidents which developed from almost nothing into a suspense filled thrilling ending. You will never read any of the stories I have written in this book, anywhere else in the world, because these are real incidents from my life which no one else in this world has experienced. Every story in this book has really happened and I have written exactly as it happened. I am the central character in almost all my stories in this book, except a few. The first story in this true life story book is about a small incident which left a mark on my forehead visible even today, fifty years hence and the latest story in my true life story book is about the heart attack I went through during the time I was writing this true life story book and how I survived it, to write that story also in as much detail as humanly possible, in this book. Each of my true life story, is a book on its own. It is possible to read each story independently and without following any sequence. I have written each and every story in this true life story book with the same passion for writing as my first story. A True Life Story Book actually tells my story. It is my Autobiography or an insight into my life and world to you.

Career and Family Dec 23 2021 "In *Career and Family*, Claudia Goldin builds on decades of complex research to examine the gender pay gap and the unequal distribution of labor between couples in the home. Goldin argues that although recent public and private discourse has brought these concerns to light, the actions taken—such as a single company slapped on the wrist or a few progressive leaders going on paternity leave—are the economic equivalent of tossing a band-aid to someone with cancer. These solutions, Goldin writes, treat the symptoms and not the disease of gender inequality in the workplace and economy. Goldin points to data that reveals how the pay gap widens further down the line in women's careers, about 10 to 15 years out, as opposed to those beginning careers after college. She examines five distinct groups of women over the course of the twentieth century: cohorts of women who differ in terms of career, job, marriage, and children, in approximated years of graduation—1900s, 1920s, 1950s, 1970s, and 1990s—based on various demographic, labor force, and occupational outcomes. The book argues that our entire economy is trapped in an old way of doing business; work structures have not adapted as more women enter the workforce. Gender equality in pay and equity in home and childcare labor are flip sides of the same issue, and Goldin frames both in the context of a serious empirical exploration that has not yet been put in a long-run historical context. *Career and Family* offers a deep look into census data, rich information about individual college graduates over their lifetimes, and various records and new sources of material to offer a new model to restructure the home and school systems that contribute to the gender pay gap and the quest for both family and career"--

Language Teachers' Stories from their Professional Knowledge Landscapes Jan 12 2021 *Language Teachers' Professional Knowledge Landscapes* is a collection of fourteen narratives from teachers of different languages, at different school levels, in different contexts across Australia. This volume brings together not simply language teacher stories, but also more political stories of the problems associated with school programs and contexts. Highlighted through these stories are some of the major political issues in schools that impact language teachers' work, and their students' success in sustained language study. The book is conceptually framed by the work of Clandinin and Connelly (1996) and their notion of 'levels' of stories told by teachers about their classrooms: the secret, the sacred and the cover stories. The term 'professional knowledge landscape' is used to indicate how teachers can critically situate their work, and thereby understand it better. The collection includes the stories of two outstanding primary language educators, and a story of mixed success in a rural

program in teaching the local Aboriginal language (Ngarrabul). There are stories of frustration with policy failures, particularly in supporting the learning of Asian languages. Many of the teacher narrators ask the confronting question: 'What blocks language learning in Australia?' They offer the strategies which they have developed, that they see making a difference. Other narratives offer autoethnographic tracking of careers, for example, as a teacher of Latin and Classics, Japanese, French, Spanish, Russian, and of teachers' ongoing vigour and creativity in advocacy. A number of teachers examine their own identity story for the intercultural learning, which they then offer and extend in student learning. Consistently expressed, there is the need for teachers to take up individual responsibility, while still being strongly supported by their professional community: 'It is us' who make the difference, one teacher concludes. Supported by a strong Foreword by Canadian scholar F. Michael Connelly, this ground-breaking collection of narratives represents a form of social research in providing critical illustrations of the issues needing attention for national language education enhancement. It is the only extended inquiry into language teaching in the context of an active policy initiative environment, and the first volume to address the language education landscape through the voices of active language teachers.

Story, Not Study: 30 Brief Lessons to Inspire Health Researchers as Writers Dec 11 2020 Many researchers dread writing. They find it laborious - even painful - to put their scholarly work into words. They get bogged down in the study, and lose track of the story. And they produce uninspiring papers that fail to resonate with readers or reviewers. This book offers an antidote to this problem: brief, accessible lessons that guide researchers to write clear and compelling scientific manuscripts. The book is divided into three sections - Story, Craft, and Community. The Story section offers advice on getting the balance of study and story just right, introducing strategies for tackling each section of a scientific manuscript. The Craft section considers the grammatical and rhetorical tools of the trade, showing how they can be wielded for maximum impact. And the Community section offers suggestions for writing collaboratively, supporting other writers, and navigating peer review. Each section features multiple short and pragmatic lessons, peppered with illustrative examples. Readers can use the chapters collectively to build holistic writing skills, or dip in and out to refine specific elements of the craft. Rooted in a coaching philosophy, we aim to unlock our readers' potential as writers through instruction, reflection, and example. And we hope to inspire researchers to face writing with joy. This work is clearly written and easily understandable. Its many practical examples, tools, and exercises make an effective toolbox of support for scholarly writers. This will be invaluable to new scholars and help established scholars as well. The inclusion of examples specific to the health arena and the clear, elegantly simple explanations add strength and relevance to this work. Toni Ungaretti, Johns Hopkins School of Education, Baltimore, MD, USA This book is the most original perspective I have ever read about the craft of writing. As its title suggests, it is inspiring.
