*Creating a Veteran-Friendly Campus: Strategies for Transition and Success* Jun 15 2021 As the United States? wars in Afghanistan and Iraq continue, increasing numbers of students who experienced combat will enroll in colleges and universities. There is mounting evidence that these veterans will require support unique to their needs beyond the processing of financial aid paperwork from the Veterans Administration. Obviously, combat frequently inflicts injuries, both physical and mental, that will require attention, but veterans are a unique population in other ways as well. Soldiers experience extraordinary bonding in wartime, and colleges can provide opportunities for that fellowship to be a source of support and connection. Female veterans will bring a new, nontraditional perspective to campus, and student service organizations should pay careful attention. There is also a significant group of students who leave for service and return?under the best of circumstances, they need accommodation to succeed. Institutions of higher education traditionally have responded to the needs of special student populations by developing programs and offering services. This volume contains information about programmatic initiatives that can help create a welcoming environment for veterans, one that encourages serious, creative involvement. The authors bring broad experience and deliberate consideration to bear on questions that are only becoming more important to the entire spectrum of American colleges and universities. This is the 126th volume

**Targeting Investments in Children** Aug 06 2020 A substantial number of American children experience poverty: about 17 percent of those under the age of eighteen meet the government's definition, and the proportion is even greater within minority groups. Childhood poverty can have lifelong effects, resulting in poor educational, labor market, and physical and mental health outcomes for adults. These problems have long been recognized, and there are numerous programs designed to alleviate or even eliminate poverty; as these programs compete for scarce resources, it is important to develop a clear view of their impact as tools for poverty alleviation. Targeting Investments in Children tackles the problem of evaluating these programs by examining them using a common metric: their impact on earnings in adulthood. The volume's contributors explore a variety of issues, such as the effect of interventions targeted at children of different ages, and study a range of programs, including child care, after-school care, and drug prevention. The results will be invaluable to educational leaders and researchers as well as policy makers.
