[Business-to-Business Marketing](#) Sep 21 2021 The Second Edition of this bestselling B2B marketing textbook offers the same accessible clarity of insight, combined with updated and engaging examples. Each chapter contains a detailed case study to further engage the reader with the topics examined. - Featuring updated case studies and a range of new examples. - Incorporating additional coverage of B2B branding and the B2B strategic marketing process, and issues of sustainability. - Extended coverage of Key Account Management - Online lecturer support including PowerPoint slides and key web links Drawing on their substantial experience of business-to-business marketing as practitioners, researchers and educators, the authors make this exciting and challenging area accessible to advanced undergraduate and to postgraduate students of marketing, management and business studies. Praise for the Second Edition: 'I found that the first edition of Brennan, Canning and McDowell's text was excellent for raising students' awareness and understanding of the most important concepts and phenomena associated with B2B marketing. The second edition should prove even more successful by using several new case studies and short 'snapshots' to illustrate possible solutions to common B2B marketing dilemmas, such as the design and delivery of business products and services, the selection of promotional tools and alternative routes to market. The new edition also deals clearly with complex issues such as inter-firm relationships and networks, e-B2B, logistics, supply chain management and B2B branding' - Michael Saren, Professor of Marketing, University of Leicester 'This textbook makes a unique contribution to business-to-business teaching: not only does it provide up-to-date cases and issues for discussion that reach to the heart of business-to-business marketing; it also brings in the latest academic debates and makes them both relevant and accessible to the readers. A fantastic addition to any library or course' - Dr Judy Zolkiewski, Senior Lecturer in Business-to-Business Marketing, Manchester Business School 'The advantage of the approach taken by Brennan and his colleagues is that this book manages to convey both the typical North American view of B2B marketing as the optimisation of a set of marketing mix variables, and the more emergent European view of B2B Marketing as being focused on the management of relationships between companies. This updated second edition sees the addition of a number of 'snapshots' in each chapter that bring the subject alive through the description of current examples, as well as some more expansive end-of-chapter case studies. It is truly a most welcome addition to the bookshelves of those students and faculty interested in this facet of marketing' - Peter Naudé, Professor of Marketing, Manchester Business School 'The strength of this text lies in the interconnection of academic theory with real world examples. Special attention has been given to the role that relationships play within the Business-to-business environment, linking these to key concepts such as segmentation, targeting and marketing communications, which importantly encompasses the role personal selling as relationshipcommunications building and not just order taking. With good coverage of international cultural differences this is a valuable resource for both students of marketing and sales' - Andrew Whalley, Lecturer in Business-to-Business Marketing, Royal Holloway University of London 'The text provides an authoritative, up-to-date review of organisational strategy development and 'firmographic' market segmentation. It provides a comprehensive literature review and empiric examples through a range of relevant case studies. The approach to strategy formulation, ethics and corporate social responsibility are especially strong' - Stuart Challinor, Lecturer in Marketing, Newcastle University 'This revised second edition offers an excellent contemporary view of Business-to-Business Marketing. Refreshingly, the text is packed with an eclectic mix of largely European case studies that make for extremely interesting reading. It is a 'must read' for any undergraduate or postgraduate Marketing student' - Dr Jonathan Wilson, Senior Lecturer, Ashcroft International Business School, Anglia Ruskin University, Cambridge

Business Structures Oct 30 2019 A popular and highly-adaptable casebook for use in either a three-credit or four-credit course on business organizations or corporations. The second edition continues the traits that made the original so popular. The book is intended for all law students, whether they will practice on Wall Street or Main Street. It is aimed not only at those who were finance majors and know that they will take advanced corporate courses. It's also for the poetry majors who assume that they are going to dislike the course. Students who use the book are often shocked at how much they enjoy the subject and class. The book best meets law students' need to understand not only the legal issues that arise in battling for control of a large, mature public corporation, but also the legal and business issues that arise in starting and growing a new business. The book is student-friendly; it speaks to the student and conveys much meaningful information, much like a text book in other fields. It features problems and questions that integrate and develop doctrine. Unlike many other casebooks that merely cobble together a series of cases and open-ended questions, the book carefully teaches, in an enjoyable but organized way. During class, the professor can focus on the fun material; the book has already taught students the nuts and bolts. The book has a unique structure, as students follow a business (Bubba's Burritos) through every phase of each of the business structures. The course builds with the same cast of characters, as they explore how to form a business, how to make it grow, how to raise capital, how to transfer ownership, how to assess liability issues, and how the business may come to an end. This same business life cycle is experienced for the sole proprietorship, general partnership, close corporation, public corporation, limited partnership, and LLC. Students will compare and contrast the advantages and disadvantages of each business structure. The book draws on special resources. The contributions of Mike Roberts, of the Harvard Business School, are especially obvious. Students benefit from B-School materials, excerpts from periodicals, problems, and lots of original text to focus on both business and legal issues. Likewise, new co-author George Shepherd, a legal scholar and economist, offers economic theory-made-easy: he translates important economic concepts into simple language that all can enjoy. And it's SHORT. It provides a comprehensive view of business organizations in fewer than 850 pages, including some light-hearted (and light-headed) efforts at humor. We don't force the professor to spend hours trying to determine what parts of a bloated book are important enough to assign. We have done the distilling for you. The book features the innovation of asking questions before most cases (as well as after), to focus the students' reading. The combination of cases is compelling - the old classics plus new teaching vehicles that will become classics. In addition, the second edition features up-to-the minute discussion of new developments such as CEO compensation and Sarbanes-Oxley. These materials can be adapted to almost any need. For those desiring full coverage of publicly traded corporations, no problem, as the book treats Section 16b, proxy fights, and takeovers. Those desiring to leave those materials out will find plenty for a full three- or four-credit course on the variety of business structures.

**Business Law, 5th Edition** Sep 02 2022 Business Law, 5th Edition (James et al.) is written for business students to provide a clear and accessible introduction to the legal system. Business law courses are the first exposure to law for many business students and the first time they are obliged to think deeply about the discipline. This updated edition presents business law in a practical context rather than the doctrinal context that many major legal publishers use. The Business Law interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Herbert Smith Freehills, animated work problems and questions with immediate feedback. This new edition is a unique resource that can form the basis of a blended learning solution for lecturers.

**Quantitative Methods for Business** Dec 01 2019 Taking a non-threatening, non-theoretical approach to a subject students often find difficult, this book avoids rigorous mathematics and concentrates on applying quantitative ideas to the work situation.

**Introduction to Business** Dec 13 2020

**Dynamic Business Law: The Essentials** Jul 20 2021 Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.

**Economics** Jan 26 2022 Economics has never been so exciting to learn!
