Convicted and Condemned Feb 22 2022 Winner, W. E. B. DuBois Distinguished Book Award presented by the National Conference of Black Political Scientists Examines the lifelong consequences of a felony conviction through the compelling words of former prisoners Felony convictions restrict social interactions and hinder felons' efforts to reintegrate into society. The educational and vocational training offered in many prisons are typically not recognized by accredited educational institutions as acceptable course work or by employers as valid work experience, making it difficult for recently-released prisoners to find jobs. Families often will not or cannot allow their formerly incarcerated relatives to live with them. In many states, those with felony convictions cannot receive financial aid for further education, vote in elections, receive welfare benefits, or live in public housing. In short, they are not treated as full citizens, and every year, hundreds of thousands of people released from prison are forced to live on the margins of society. Convicted and Condemned explores the issue of prisoner reentry from the felons' perspective. It features the voices of formerly incarcerated felons as they attempt to reconnect with family, learn how to acclimate to society, try to secure housing, find a job, and complete a host of other important goals. By examining national housing, education and employment policies implemented at the state and local levels, Keesha Middlemass shows how the law challenges and undermines prisoner reentry and creates second-class citizens. Even if the criminal justice system never convicted another person of a felony, millions of women and men would still have to figure out how to reenter society, essentially on their own. A sobering account of the after-effects of mass incarceration, Convicted and Condemned is a powerful exploration of how individuals, and society as a whole, suffer when a felony conviction exacts a punishment that never ends.

Sustainability and Short-Term Policies Mar 02 2020 There has been a profound change within the sphere of government and societal regulation in recent years. Traditional hierarchical government has been challenged by new governance instruments relying on negotiations instead of command and control. Alongside this development there has been a change in the time-framing of politics and steering. Traditional politics implicitly has been based on stability and permanence while new forms of governance explicitly are based on just-in-time actions such as projects and issue-based collaborations in networks and programs. This book analyses the implications of this shortening of time frames, focusing particularly on spatial policy interventions. Spatial policies have a special relevance when it comes to governance and new forms of societal steering. On the one hand, the local (geographical) level in politics is the principal battleground for the struggle between top down and bottom up approaches and aspirations. On the other hand, many of the most burning issues of our time require a global, strategic approach, for example, climate change, resource depletion, population growth are anchored in space and the physical world. Whether and how short-term spatial approaches can achieve sustainable development outcomes is thus a critical question, and forms the focus of this volume. The book examines the characteristics of temporary policy measures across a range of rural, urban and regional contexts, in four continents: Europe, North America, Oceania and Africa. The outcomes and effects of these policies and interventions are analysed, particularly focusing on the tension between short-term interventions and long-term effects.

Macroeconomics Brief Edition Jun 04 2020 McConnell, Brue and Flynn's Macroeconomics: Brief Edition, 2e comes from the same author team as the market-leading Principles of Economics textbook. Macroeconomics: Brief Edition tailors the core concepts from proven leader Macroeconomics, 19th edition to create a concise introduction to the course that is distinct in purpose, style, and coverage. Like the 19th edition, Macroeconomics: Brief Edition, 2e continues to be innovative while teaching students in a clear, unbiased way. Content and pedagogy have 3 main goals: help the beginning student master the principles essential for understanding the economic problem, specific economic issues, and the policy alternatives; help the student understand and apply the economic perspective and reason accurately and objectively about economic matters; and promote a lasting student interest in economics and the economy. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Essentials of Economics May 28 2022 Bureaucracy Jan 12 2021 The classic book on the way American government agencies work and how they can be made to work better -- the "masterwork" of political scientist James Q. Wilson (The Economist) In Bureaucracy, the distinguished scholar James Q. Wilson examines a wide range of bureaucracies, including the US Army, the FBI, the CIA, the FCC, and the Social Security Administration, providing the first comprehensive, in-depth analysis of what government agencies do, why they operate the way they do, and how they might become more responsible and effective. It is the essential guide to understanding how American government works.

American Government: Institutions and Policies: The Essentials Aug 31 2022 Acclaimed for the scholarship of its prominent authors and the clarity of its narrative, AMERICAN GOVERNMENT: THE ESSENTIALS preserves the structure of the main text but replaces the policy chapters with one brief chapter on the policymaking process while maintaining focus on three fundamental topics: the importance of institutions of American government; the historical development of governmental procedures, actors, and policies; and who governs in the United States and to what ends. Student involvement in the material is bolstered by proven pedagogical features such as learning objectives, Who Governs? and To What Ends? questions framing each chapter, and How Things Work boxes that illustrate important concepts. A state-of-the-art media package with new online tools makes the learning experience engaging and accessible. The Long Shadow of Informality Dec 23 2021 A large percentage of workers and firms operate in the informal economy, outside the line of sight of governments in emerging and developing economies. This may hold back the recovery in these economies from the deep recessions caused by the COVID-19 pandemic--unless governments adopt a broad set of policies to address the challenges of widespread informality. This study is the first comprehensive analysis of the extent of informality and its implications for a durable economic recovery and for long-term development. It finds that pervasive informality is associated with significantly weaker economic outcomes--including lower government resources to combat recessions, lower per capita incomes, greater poverty, less financial development, and weaker investment and productivity.

International Institutions and National Policies Mar 14 2021 The proliferation of international institutions and their impact has become a central issue in international relations. Why do countries comply with international agreements and how do international institutions influence national policies? Most theories focus on the extent to which international institutions can wield "carrots and sticks" directly in their relations with states. Xinyuan Dai presents an alternative framework in which they influence national policies indirectly by utilizing non-state actors (NGOs, social movements) and empowering domestic constituencies. In this way, even weak international institutions that lack "carrots and sticks" may have powerful effects on states. Supported by empirical studies of environmental politics, human rights and economic and security issues, this book sheds fresh light on how and why international institutions matter. It will be of interest to students, scholars and policymakers in both international relations and international law.

OECD Review of Fisheries Aug 07 2020 This edition of the OECD Review of Fisheries: Policies and Summary Statistics consists of two parts. Part I describes recent trends and policies in the fisheries and aquaculture sectors of OECD countries, in addition to examining fisheries issues in several major emerging economies. Part II also introduces findings from the OECD-FAO Outlook for 2012-2021, policy developments in OECD countries as well as in the world and major activities of the OECD Fisheries Committee. Part II consists of country notes providing a brief review of the fisheries and aquaculture sectors in OECD member countries, as well as in Argentina, China, Chinese Taipei, Indonesia, Russia and Thailand. These reviews all highlight recent policy developments.

A Short History of American Industrial Policies Jun 28 2022 For nearly four centuries, Americans have debated the government's proper role in developing the economy. Some argue that the economy develops the best when government intervenes the least. Others counter that the economy best develops when government and business work together to that end. A Short History of American Industrial Policies analyzes the ideological, political, and industrial policy struggle from the colonial era to the 1990s. To give a complete understanding, both the chronology and process of America's industrial policymaking and policies are explored in depth throughout.

**Macroeconomic Fluctuations and Policies** Nov 09 2020 *The basic tools for analyzing macroeconomic fluctuations and policies, applied to concrete issues and presented within an integrated New Keynesian framework. This textbook presents the basic tools for analyzing macroeconomic fluctuations and policies and applies them to contemporary issues. It employs a unified New Keynesian framework for understanding business cycles, major crises, and macroeconomic policies, introducing students to the approach most often used in academic macroeconomic analysis and by central banks and international institutions. The book addresses such topics as how recessions and crises spread; what instruments central banks and governments have to stimulate activity when private demand is weak; and what "unconventional" macroeconomic policies might work when conventional monetary policy loses its effectiveness (as has happened in many countries in the aftermath of the Great Recession.). The text introduces the foundations of modern business cycle theory through the notions of aggregate demand and aggregate supply, and then applies the theory to the study of regular business-cycle fluctuations in output, inflation, and employment. It considers conventional monetary and fiscal policies aimed at stabilizing the business cycle, and examines unconventional macroeconomic policies, including forward guidance and quantitative easing, in situations of "liquidity trap"—deep crises in which conventional policies are either ineffective or have very different effects than in normal time. This book is the first to use the New Keynesian framework at the advanced undergraduate level, connecting undergraduate learning not only with the more advanced tools taught at the graduate level but also with the large body of policy-oriented research in academic journals. End-of-chapter problems help students master the materials presented.*
