**(Hidden) Minorities** Nov 24 2021 This book asks why several ethnic and linguistic groups in Central Europe and the Balkans have not yet been legally recognized as national minorities. Some of these hidden minorities have not developed an intellectual elite that can visibly present their identity and claims to the majority population. Other groups are deliberately

concealing their existence and language for reasons of self-protection. The chapters in this volume address the everyday mechanisms of hiding and being hidden in the transition zone of these two European regions.

*Taken for Granted* May 19 2021 A Fox News political analyst tackles some of our communities' toughest challenges with timely insight from his own life: the story of how conservative values helped a kid from the South Side of Chicago find a life of opportunity. "A must-read."—Brian Kilmeade, bestselling author of *Sam Houston* and *the Alamo Avengers* Born to a mother consumed by drugs and raised by his grandmother in poverty on the South Side of

Chicago, Gianni Caldwell saw firsthand how lawmakers from both parties have failed African American voters on issues like poverty, welfare, and education. But as someone who beat the odds growing up under a fear-based mentality that limits what people can achieve, Caldwell believes there's another way. In this groundbreaking book, the Fox News analyst describes his personal journey while detailing a hopeful vision for a nation no longer beholden to identity politics and self-limitations. Trapped within the expectations and traditions of our communities, families, political parties, faith, race, and gender, we fail to challenge our politicians and ourselves to create real change. Now more than ever, we need to confront preconceived notions about the Democrats and Republicans, public policy, and American history. Looking at the obstacles facing urban communities, such as crime, education, and social mobility, Caldwell digs beneath the statistics. By spotlighting the moments that

enabled his rise to success, he proffers steps that can help more people overcome the odds—whether through policy reform or the heroic efforts of men and women who are already working to make a difference in their own communities.

*The Locke Reader* Oct 31 2019 John Yolton seeks to allow readers of Locke to have accessible in one volume sections from a wide range of Locke's books, structured so that some of the interconnections of his thought can be seen and traced. Although Locke did not write from a system of philosophy, he did have in mind an overall division of human knowledge. The readings begin with Locke's essay on Hermeneutics and the portions of his Essay Concerning Human Understanding on how to read a text. The reset of the selections are organized around Locke's division of human knowledge into natural science, ethics, and the theory of signs. Yolton's introduction and commentary explicate Locke's doctrines and

provide the reader with the general background knowledge of other seventeenth-century writers and their works necessary to an understanding of Locke and his time.

**Sex Shamans** Aug 29 2019 20 transformative stories and sexual healing practices from international pioneers in the sexual shamanism movement • Reveals intimate details about how each sex shaman overcame personal struggles with heartache, jealousy, mental illness, or social shame to realize their calling as a sacred sexual healer • Includes 20 in-depth embodiment exercises such as soul gazing, contacting your spirit guides, sexual divination, energetic sex, self-pleasuring, moon blood rituals, and sacred sexual storytelling • Includes contributions from 20 diverse voices in the sexual shamanism community, all part of the mystery school ISTA: International School of Temple Arts Drawing on traditional and modern practices, a sex shaman uses the power of erotic energy as a healing

medicine. They channel divine love and embrace sexuality freely, practicing polyamory, sexual healing, and even sex magic. They teach tantra, trance dance, kundalini yoga, and other techniques for healing shame, guilt, fear, and sexual trauma. Designed to guide the reader on a journey into their own sacred sexual awakening, this book shares true stories from 20 visionary pioneers in the sexual shamanism movement, all of them associated with the International School of Temple Arts (ISTA), a mystery school that works to illuminate the path of sexual shamanism and heal the split between sex and spirit, release the shame surrounding sexual awakening, and inspire more sexual liberation around the world. The teachers reveal intimate details of their life stories and sexual awakening journeys, showing how, by surrendering to the wisdom of the erotic current of the universe, transformation occurs. Each story is accompanied by an in-depth embodiment exercise with step-by-step instructions, including

soul gazing, contacting your spirit guides, sexual divination, energetic sex, self-pleasuring, moon blood rituals, and sacred sexual storytelling. Underlying these exercises is the belief that the body is a temple that opens with pleasurable worship so spirit may dwell more fully within. The 20 contributors include Baba Dez Nichols, Bruce Lyon, Crystal Dawn Morris, Dawn Cherie, Deborah Taj Anapol, Ellie Wilde, Janine Ma-Ree, KamalaDevi McClure, Komala Lyra, Laurie Handlers, Lin Holmquist, Matooka Moonbear, Mia Mor, Ohad Pele Ezrahi, Patrik Olterman, Raffaello Manacorda, Ria Bloom, Sean O'Faolain, Stephanie Phillips, and Stephen SouLove.

Protecting Pollinators Dec 26 2021 We should thank a pollinator at every meal. These diminutive creatures fertilize a third of the crops we eat. Yet half of the 200,000 species of

pollinators are threatened. Birds, bats, insects, and many other pollinators are disappearing, putting our entire food supply in jeopardy. Protecting Pollinators breaks down the latest science on environmental threats and takes readers inside the most promising conservation efforts. Efforts range from cities creating butterfly highways to citizen scientists monitoring migration. Along with inspiring stories of revival and lessons from failed projects, readers will find practical tips to get involved. And they will be reminded of the magic of pollinators--the iconic monarchs, dainty hummingbirds, and homely bats alike who bring food to our tables.

*Multi-species Systems in Optical Lattices* Sep 03 2022 This highly interdisciplinary thesis covers a wide range of topics relating to the interface of cold atoms, quantum simulation, quantum magnetism and disorder. With a self-contained presentation, it provides a broad overview of the

rapidly evolving area of cold atoms and is of interest to both undergraduates and researchers working in the field. Starting with a general introduction to the physics of cold atoms and optical lattices, it extends the theory to that of systems with different multispecies atoms. It advances the theory of many-body quantum systems in excited bands (of optical lattices) through an extensive study of the properties of both the mean-field and strongly correlated regimes. Particular emphasis is given to the context of quantum simulation, where as shown here, the orbital degree of freedom in excited bands allows the study of exotic models of magnetism not easily achievable with the previous alternative systems. In addition, it proposes a new model Hamiltonian that serves as a quantum simulator of various disordered systems in different symmetry classes that can easily be reproduced experimentally. This is of great interest, especially for the study of disorder in 2D quantum systems.
