*Visual Note-Taking for Educators: A Teacher's Guide to Student*

*Creativity* Sep 10 2020 A step-by-step guide for teachers to the benefits of visual note-taking and how to incorporate it in their classrooms. We've come a long way from teachers admonishing students to put away their drawings and take traditional long-form notes. Let's be honest: note-taking is boring and it isn't always the most effective way to retain information. This book is a guide for teachers about getting your students drawing and sketching to learn visually. Whether in elementary school or high school, neuroscience has shown that visual learning is a very effective way to retain information. The techniques in this book will help you work with your students in novel ways to retain information. Visual note-taking can be used with diverse learners; all ages; and those who have no drawing experience. Teachers are provided with a library of images and concepts to steal, tweak, and use in any way in their classrooms. The book is liberally illustrated with student examples from elementary and high school students alike.

**A Guide to Local Environmental Auditing** Oct 31 2019 Sustainable development is still seen by authorities as an abstract concept. Local Environmental Auditing will help put it into practice. The book provides a comprehensive guide to monitoring the state of the local environment and establishing the impacts of local actions on global issues, and shows how current local authority policy and practice can be adapted to recognize environmental priorities. The authors provide both a guide to and an assessment of the subject: they link the processes with the issues, with specific information on carrying out the audit (including checklists, case studies and standards) and a detailed discussion of the issues and choices which local authorities may face. Clearly structured and accessible, this will be an essential handbook, both for local government departments and other local organizations, and students in a wide range of subjects, including environmental science and health, town planning, urban and rural studies, social science and politics.
