Ivry focuses on "low-risk" or "normal" pregnancies, using cultural comparison to explore the complex relations among ethnic ideas about procreation, local reproductive politics, medical models of pregnancy care, and local modes of maternal agency. The ethnography pieces together the voices of pregnant Japanese and Israeli women, their doctors, their partners, the literature they read, and depicts various clinical encounters such as ultrasound scans, explanatory classes for amniocentesis, birthing classes, and special pregnancy events. The emergent pictures suggest that although experiences of pregnancy in Japan and Israel

differ, pregnancy in both cultures is an energy-consuming project of meaning-making— suggesting that the sense of biomedical technologies are not only in the technologies themselves but are assigned by those who practice and experience them. The first pillar is based on a stronger interdisciplinary collaboration and a multi-professional partnership in the field of Intensive and Critical Care Medicine. In recent decades,

professional activity in medicine has been regulated by well-defined, universal principles, such as the welfare of the patient, autonomy, social justice, and the patient-physician relationship. The second pillar, ethics, has offered welcomed assistance to all these principles in establishing an ethics curriculum.

*Financial Management for

Success as a manager means understanding - and then mastering - the basics of finance and accounting as practiced in institutional health

care. Financial Management for Heath-System Pharmacists provides pharmacy managers with a set of fundamental financial management tools as they relate not only to pharmacy department management, but to the management of the hospital and health care system.

Petrostate Oct 31 2019 In the aftermath of the financial collapse of August 1998, it looked as if Russia's day as a

superpower had come and gone. That it should recover and reassert itself after less than a decade is nothing short of an economic and political miracle. Based on extensive research, including several interviews with Vladimir Putin, this revealing book chronicles Russia's dramatic reemergence on the world stage, illuminating the key reason for its rebirth: the use of its ever-expanding energy wealth to reassert its traditional great power ambitions. In his deft, informative narrative, Marshall Goldman traces how this has come to be, and how Russia is using its oil-based power as a lever in world politics. The book provides an informative

overview of oil in Russia, traces Vladimir Putin's determined effort to reign in the upstart oil oligarchs who had risen to power in the post-Soviet era, and describes Putin's efforts to renationalize and refashion Russia's industries into state companies and his vaunted "national champions" corporations like Gazprom, largely owned by the state, who do the bidding of the state. Goldman shows how Russia paid off its international debt and has gone on to accumulate the world's third largest holdings of foreign currency reserves--all by becoming the world's largest producer of petroleum and the world's second largest exporter. Today,

Vladimir Putin and his cohort have stabilized the Russian economy and recentralized power in Moscow, and fossil fuels (oil and natural gas) have made it all possible. The story of oil and gas in Russia is a tale of discovery, intrigue, corruption, wealth, misguidance, greed, patronage, nepotism, and power. Marshall Goldman tells this story with panache, as only one of the world's leading authorities on Russia could.

### **Strategic Management of Health Care Organizations**

Jan 27 2022 The 6th edition of this established text is streamlined to a more manageable format, with the Appendices moved to the website and a significant shortening of the main text. There is a greater focus on the global analysis of industry and

competition; and analysis of the internal environment. In consultation with feedback from their adopters, the authors have concentrated on the fundamentals of strategy analysis and the underlying sources of profit. This reflects waning interest among senior executives in the pursuit of short-term shareholder value. As ever students are provided with the guidance they need to strategic planning, analysis of the health services environment (internal and external) and lessons on implementation; with additional discussion of organizational capability, deeper treatment of sustainability and corporate

social responsibility and more coverage of the sources of organizational inertia and competency traps. This edition is rich in new examples from real-world health care organizations. Chapters are brought to life by the 'Introductory Incidents', 'Learning Objectives', 'Perspectives', 'Strategy Capsules', useful chapter summaries; and questions for class discussion. All cases and examples have been updated or replaced. In this edition the teaching materials and web supplements have been greatly enhanced, with power-point slides, to give lecturers a unique resource.
