The 2000s Feb 10 2021 Welcome to Pop Culture 2.0. In the 2000s, Generation eXposure, emerged from the marriage of new technology and the nation's obsession with celebrity. Social media technology, such as MySpace, YouTube, Facebook, and countless blogs, gave everyman a voice and a public persona that they could share with friends across the street or around the world. Suddenly, it was not enough to imitate Britney Spears or Paris Hilton, technology gave everyone a platform to launch their own 15 minutes of fame. The fixation on self and celebrity acted as a diversion from more serious challenges the nation faced, including President George W. Bush's War on Terror. The wars overseas sharply divided the country, after a moment of national unity after the terrorist attacks on 9/11, which took away one of the world's most recognizable buildings. The era witnessed interest rates dropping to historic lows, but later subprime became one of the most searched terms on Google as the nation teetered on recession. Big was in like never before and suddenly people nationwide could buy or build their own McMansion-a slice of the American dream. While supersized homes and fast food meals became commonplace, the electronics and transportation advances proved that good things came in increasingly smaller packages. Apple's iPod reinvented how people interacted with music, hybrids changed thoughts on fuel efficiency as a gallon of gas topped \$3. Cell phones usage ballooned in our always on society, while physically shrinking to the size of a deck of cards. Yes, me-centric Pop Culture 2.0, which the pundits predicted would some day arrive, burst onto the scene and ultimately transformed the way we interact with one another and the world around us. Chapters inside the latest volume in the American Popular Culture Through History series explore various aspects of popular culture, including advertising, literature, leisure activities, music visual arts, and travel. Supplemental resources include a timeline of important events, cost comparisons, and an extensive bibliography for further reading.

Enhancing Financial Inclusion through Islamic Finance, Volume II Oct 09 2020 This book is the second of two volumes which highlight the concept of financial inclusion from the Islamic perspective. An important element of the Sustainable Development Goals (SDGs), financial inclusion has been given significant prominence in reform and development agendas proposed by the United Nations and G-20. The significance of Islamic financial inclusion goes beyond improved access to finance to encompass enhanced access to savings and risk mitigation products, as well as social inclusion that allows individuals and companies to engage more actively in the real economy. It represents one of the important drivers of economic growth. This volume explores the financial risks associated with lending to low-income groups due to high poverty levels and the lack of collateralization mechanisms. The first book on the market to provide empirical evidence of Islamic microfinance, deposit insurance and micro-entrepreneurship through the analysis of models and country case studies, this edited collection will be of value to those researching development finance, financial inclusion and Islamic finance.

To Err Is Human Feb 22 2022 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. To Err Is Human breaks the silence that has surrounded medical errors and their consequences—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. To Err Is Human asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

Globalization and Regional Dynamics Jul 06 2020 The writings by Japanese and Gennan economists presented here originated against the backdrop of ongoing globalization processes and notable fluctuations in regional economic dynamics observable at the same time, primarily in the East and South East Asian area. They provided the occasion for these writers to come to terms with globalization processes, and in particular with the stabilizing and destabilizing elements at work in them. This is the basis for their investigation of the options provided by economics and economic policy for stabilizing an ever more tightly interwoven world economy. The regional focal points of the contributions are the East Asian realm and the European Union, and the points of view are in every case both from the Japanese and the Gennan side. Questions of international competition and mechanisms of the spread of the crisis in the wake of globalization processes lie at the centre of the analyses by Hisashi Watanabe and Willy Kraus. Hisashi Watanabe focusses on the relationship, an especially important one from the Japanese perspective, between Japan and South Korea and takes up the problem of South Korea's demand that Japan should energetically promote its own transition to a service-sector-oriented society and withdraw from certain areas of manufacturing. This, it is argued, will grant Japan's Asian neighbours better chances for development and make a positive contribution to the economic stabilization of the region.

Practice Papers for the MRCGP Written Exam, Paper 1 Mar 14 2021 Suitable for those sitting Paper 1 of the MRCGP Written examination. Paper 1 comprises 12 questions, featuring multiple essay questions (MEQs) and critical appraisal style questions to be answered in 3.5 hours.

Life Cycle Assessment and Environmental Impact of Polymeric Products Jun 04 2020 This review describes the process of life cycle analysis in some detail. It describes the different organisations involved in researching and applying these techniques and the database resources being used to generate comparative reports. The overview explains the factors to be considered, the terminology, the organisations involved in developing these techniques and the legislation which is driving the whole process forward. The ISO standards relating to environmental management are also discussed briefly in the document. Design for the environment is covered in the report. This review is accompanied by summaries of selected papers on life cycle analysis and environmental impact from the Rapra Polymer Library database.

The Earthscan Reader in Rural-Urban Linkages Nov 09 2020 With accelerating urbanization and growing inter-dependence of rural and urban dwellers on the markets and resources they each offer, ruralurban linkages have become a very important focus in recent years for research and policy relating to local and national economic development, poverty reduction and governance. The emergence of new livelihoods based on diversified income sources and mobility reflects profound social, cultural and economic transformations, and new forms of resource allocation and use. This volume collects the key contributions in the field, covering the conceptual background, the key issues and the current debates, locating different approaches in their wider intellectual and historical contexts. It also includes important recent empirical work from all the relevant geographical regions that that will be the basis for future thinking. Fifteen papers are clearly organized around the principal themes and accompanied by a valuable editorial introduction clearly setting out the issues, the arguments and the evidence. Suggestions for further reading and additional information sources are also included. Published with IIED.

Human Trafficking Aug 07 2020 Human trafficking captured the attention of the global community well over a decade ago, inspiring multifarious international, national, regional and local responses. While formally recognized as one of the major threats associated with transnational organized crime, human trafficking remains an issue about which much has been written and yet little is known or supported by empirical evidence. The essays selected for this volume reflect four key areas of debate: the transnational organized crime framework; the data and research landscape; the implementation of anti-trafficking responses; and the articulation of alternative responses to human trafficking. These essays are written by well-known and more recent contributors to this field of research. The collection draws attention to contemporary arguments as well as recent empirical research, and points to the importance of contextualizing human trafficking within both the global and local setting. This volume reflects where human trafficking data, research and debate is currently located and where it is heading, and as such is of interest to academics, students, policymakers and practitioners.

Modern Contemporary Oct 28 2019 MODE LIFESTYLE MAGAZINE JANUARY/FEBRUARY 2012 COLLECTOR'S EDITION - Editor's Letter: Welcome to the January/February 2012 Collector's Edition of Mode Lifestyle Magazine and welcome to the New Year! The end of 2011 marked another positively eventful year for Mode Lifestyle Magazine with some new faces joining our editorial team and with excitement as we prepare for the shooting of our first feature film "IN THE MODE" in 2012. We are very happy to have added a new section to the magazine, "Teenagers Are Always Right", that will be published from the Mar/April 2012 edition. With expert advice from our new editorial contributors, this section will give teenagers ideas on how to tackle some of the challenges they experience as they approach adulthood. As usual we have our beautiful editorials shot across the globe and also profiles of artists such as Philip Ross Munro and successful entrepreneurs such as Thomas Kramer. Troy Brauntuch Mar 26 2022 A member of the so-called Pictures Generation, Troy Brauntuch ndash; whose career spans some three decades ndash; has often been characterized, with his peer Jack Goldstein, as taking a postmodern attitude toward representation. He is well known for his works from the end of the 1970s and beginning of the 1980s in which he decontextualized what would otherwise be hyperbolically charged content. In his most recent work, Brauntuch extends his investigations to the space between a thing and our idea of it. In his photographs, everyday objects assert their ephemerality, and a tangible, intimate silence seems as much a part of the pictures as the simple domestic scenes they convey. This book offers the first survey of Brauntuch's work and includes newly commissioned essays by Johanna Burton and Douglas Eklund (the curator of the recent Pictures Generation exhibition at the Metropolitan Museum in New York). English text.
