New Language Lessons May 06 2020 This book is an attempt to bring the subject of language home to children at the age when knowledge is acquired in an objective way, by practice and habit, rather than by the study of rules and definitions. In pursuance of this plan, the traditional presentation of grammar in a bristling array of classifications, nomenclatures, and paradigms has been wholly discarded. The pupil is brought in contact with the living language itself : he is made to deal with speech, to turn it over in a variety of ways, to handle sentences ; so that he is not kept back from the exercise-so profitable and interesting-of using language till he has mastered the anatomy of the grammarian. Whatever of technical grammar is here given is evolved from work previously done by the scholar. - William Swinton.
