**Pay Without Performance Jun 07 2020** The company is under-performing, its share price is trailing, and the CEO gets...a multi-million-dollar raise. This story is familiar, for good reason: as this book clearly demonstrates, structural flaws in corporate governance have produced widespread distortions in executive pay. Pay without Performance presents a disconcerting portrait of managers' influence over their own pay--and of a governance system that must fundamentally change if firms are to be managed in the interest of shareholders. Lucian Bebchuk and Jesse Fried demonstrate that corporate boards have persistently failed to negotiate at arm's length with the executives they are meant to oversee. They give a richly detailed account of how pay practices--from option plans to retirement benefits--have decoupled compensation from performance and have camouflaged both the amount and performance-insensitivity of pay. Executives' unwonted influence over their compensation has hurt shareholders by increasing pay levels and, even more importantly, by leading to practices that dilute and distort managers' incentives. This book identifies basic problems with our current reliance on boards as guardians of shareholder interests. And the solution, the authors argue, is not merely to make these boards more independent of executives as recent reforms attempt to do. Rather, boards should also be made more dependent on shareholders by eliminating the arrangements that entrench directors and insulate them from their shareholders. A powerful critique of executive compensation and corporate governance, Pay without Performance points the way to restoring corporate integrity and improving corporate performance.

**IBM Business Process Manager V8.5 Performance Tuning and Best Practices May 07 2020** This IBM® Redbooks® publication provides performance tuning tips and best practices for IBM Business Process Manager (IBM BPM) V8.5.5 (all editions) and IBM Business Monitor V8.5.5. These products represent an integrated development and runtime environment based on a key set of service-oriented architecture (SOA) and business process management (BPM) technologies. Such technologies include Service Component Architecture (SCA), Service Data Object (SDO), Business Process Execution Language (BPEL) for web services, and Business Processing Modeling Notation (BPMN). Both IBM Business Process Manager and Business Monitor build on the core capabilities of the IBM WebSphere® Application Server infrastructure. As a result, Business Process Manager solutions benefit from tuning, configuration, and best practices information for WebSphere Application Server and the corresponding platform Java virtual machines (JVMs). This book targets a wide variety of groups, both within IBM (development, services, technical sales, and others) and customers. For customers who are either considering or are in the early stages of implementing a solution incorporating Business Process Manager and Business Monitor, this document proves a useful reference. The book is useful both in terms of best practices during application development and deployment and as a reference for setup, tuning, and configuration information. This book talks about many issues that can influence performance of each product and can serve as a guide for making rational first choices in terms of configuration and performance settings. Similarly, customers who already implemented a solution with these products can use the information presented here to gain insight into how their overall integrated solution performance can be improved.
