Journey to the Centre of the Earth Oct 23 2021 Journey to the Centre of the Earth has been consistently praised for its style and its vision of the world. It explores the prehistory of the globe, but can also be read as a psychological quest, for the journey itself is as important as arrival or discovery. Professor Lidenbrock and his nephew Axel travel across Iceland, and then down through an extinct crater towards a sunless sea where they enter a living past and are confronted with the origins of man. A classic of nineteenth-century French literature, the novel's distinctive combination of realism and Romanticism has marked figures as diverse as Sartre and Tournier, Mark Twain and Conan Doyle. This new translation of the complete text is faithful to the lyricism, verve, and humour of the original. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

The Best of Jules Verne Jan 02 2020 Four iconic novels of adventure, science, and fantasy from a master storyteller far ahead of his time. In *Twenty Thousand Leagues Under the Sea*, a monster wreaks havoc in the waters of the Atlantic Ocean. The US government sends a French marine biologist, his servant, and a Canadian harpoonist to take care of the problem. But instead of a mythic beast, the team finds the submarine *Nautilus* and its fearsome helmsman, Captain Nemo. *Around the World in Eighty Days* follows Phileas Fogg and his eccentric manservant, Passepartout, on an epic quest to circumnavigate the globe. Pursued by a Scotland Yard detective, derailed by a herd of bison, and attacked by Sioux Indians, the travelers use every mode of transportation possible to race from one exotic exploit to the next. From the sands of Egypt to the icy waters of the Pacific, Fogg and Passepartout never lose sight of their goal—even when they stop to rescue a beautiful damsel in distress. *Journey to the Center of the Earth* is a cornerstone of science fiction and one of the greatest stories ever told. A dirty slip of parchment paper falls from the pages of an ancient manuscript. Deciphered by the indefatigable Otto Lidenbrock, professor of geology, and his reluctant nephew, Axel, the parchment's coded message asserts that a volcano in Iceland contains a passageway to the center of the earth. Two days later, the adventurers embark on a journey so fantastic it will alter the very meaning of history. In *The Mysterious Island*, a hot air balloon hijacked by captured Union army soldiers is blown far, far away from its point of departure in Richmond, Virginia. When the craft crash-lands on an island in the South Pacific, the prisoners must contend with wild animals, pirates, and an active volcano—in a fight for their very survival. This ebook has been professionally proofread to ensure accuracy and readability on all devices.

In the Year 2889 Aug 09 2020 A classic Victorian science fiction novel from the author of *Around the World in Eighty Days* and *Journey to the Center of the Earth*. From one of the fathers of science fiction and the great-grandfather of steampunk—and purportedly coauthored by his son, Michel—this 1889 story covers a day in the life of a newspaper magnate a millennium into the future. The novel is replete with technological

predictions both prescient and improbable, such as video telephones, pneumatic transportation tubes, air cars, built-in furniture, a managed climate, and scientifically prepared food. “An exercise in letting imagination run free on describing the world of a thousand years into the future.” —genxposé

Journey to the Center of the Earth, Twenty Thousand Leagues Under the Sea, Round the World in Eighty Days Aug 28 2019 Jules Verne’s most beloved novels are gathered here in one hardcover volume: three thrilling tales of fabulous journeys under, through, and around the earth. Verne was one of the great pioneers of science fiction. Born in France in 1828, he wrote brilliantly about space, air, and underwater travel long before airplanes and space ships had been invented, and he is still one of the most widely read internationally of all science-fiction writers. But beyond charting new territory for adventurous fiction, his creations have entered our culture and taken on the magnitude and vitality of myth. It is hard to imagine anyone who has not heard of Captain Nemo and his giant submarine exploring the ruins of Atlantis in *Twenty Thousand Leagues Under the Sea*, Phileas Fogg’s frantic race around the world by every means of transportation in *Round the World in Eighty Days*, and the harrowing descent through a volcanic crater to underground caverns where prehistoric creatures roam in *Journey to the Center of the Earth*. These stories have seized the imaginations of readers for generations and are as vivid and exciting now as when their author first imagined traveling beyond the bounds of the possible. Translated by Henry Frith

Who Was Jules Verne? Dec 13 2020 Meet the father of science fiction, Jules Verne. Born in France in 1829, Jules Verne always dreamed of adventure. At age 11, he snuck onboard a ship headed for the Indies only to be discovered by his father and have his dreams dashed. After his father made him swear to only travel "in his imagination," Verne kept his promise for the rest of his life. He began writing adventure stories as a young man and became a popular writer throughout France. Known for mixing scientific discovery and literature in his books like *Twenty Thousand Leagues Under the Sea* and *Around the World in 80 Days*, Verne is often called "The Father of Science Fiction."

The Golden Volcano Apr 04 2020 The Golden Volcano thrusts two Canadian cousins unexpectedly bequeathed a mining claim in the Klondike into the middle of the gold rush, where they encounter disease, disaster, extremes of weather, and human nature twisted by a passion for gold. A deathbed confidence sends the two searching for a fabulous gold-filled volcano on the shore of the Arctic Ocean. But nature, both human and physical, hasn't finished with them, and their story plays out with the nail-biting adventure of an action thriller and the moral and emotional force of high drama. Like many of the works left unpublished when Jules Verne died, *The Golden Volcano* was altered and edited by his son, Michel. This first translation from the original manuscript allows readers of English to rediscover the pleasures of Verne's storytelling in its original form and to enjoy a virtually unknown gem of action, adventure, and style from a master of French literature.

Amazing Journeys Sep 29 2019 New, superbly translated omnibus of five of Jules Verne's most renowned stories. "One of the best storytellers who ever lived."--Arthur C. Clarke In one dazzling decade, French novelist Jules Verne took readers places they'd never gone before. . .the age of dinosaurs. . .the undersea realm of Atlantis. . .the craters and crevices of the moon. . .and a whirlwind aerial tour of the planet earth! Though he penned his unforgettable yarns in French, Verne plunked big parts of them down in America. And he himself possessed an American sassiness, nerve, and sense of humor, so Americans have returned the compliment: we've released dozens of Hollywood films based on his astonishing tales, and we've created the U.S.S. Nautilus, the NASA space missions, and other technological triumphs that have turned Verne's visions into practical reality. Here are Jules Verne's best-loved novels in one convenient omnibus volume, but with a huge difference. This book features new, accurate, accessible, and unabridged translations of these five visionary classics, translations that are complete down to the smallest substantive detail, that showcase Verne's farseeing science with unprecedented clarity and accuracy, capture the wit, prankishness, and showbiz flamboyance of one of literature's leading humorists and satirists. This is a Verne almost completely unknown to Americans. . .yet a Verne who has an uncannily American mindset! So these heroes and happenings are part of our heritage: Phileas Fogg chugging across the wild, wild west. . .the impossible underground journey of Professor Lidenbrock. . . the deep-sea exploits of secretive Captain Nemo. . .and a moon shot so realistic, it inspired U.S. astronaut Frank Borman a full century later. Jules Verne was a science buff with a showbiz background, and finally these classic stories have a translator with the same orientation: Frederick Paul Walter is one of America's foremost Verne scholars. . . But he's also a scriptwriter, broadcaster, and part-time fossil hunter! Enriched with dozens of classic illustrations, *The Amazing Journeys of Jules Verne* will be a family favorite in every home library. Jules Verne was born in 1828 into a French lawyering family in the Atlantic coastal city of Nantes. Though his father sent him off to a Paris law school, young Jules had been writing on the side since his early teens, and his pet topics were the theater, travel, and science. Predictably enough, his legal studies led nowhere, so Verne took a day job with a stock brokerage, in his off hours penning scripts for farces and musical comedies while also publishing short stories and novelettes of scientific exploration and adventure. His big breakthrough came when he combined his theatrical knack with his scientific bent and in 1863 published an African adventure yarn, *Five Weeks in a Balloon*. After that and till his death in 1905, Jules Verne was one of the planet's best-loved and best-selling novelists, publishing over sixty books. In addition to the five visionary classics in this volume, other imaginative favorites by him include *The Mysterious Island*, *Hector Servadac*, *the Begum's Millions*, *Master of the World*, and *The Meteor Hunt*. Verne ranks among the five most translated authors in history, along with Mark Twain and the Bible. Frederick Paul Walter is a scriptwriter, broadcaster, librarian, and amateur paleontologist. A Trustee of the North American Jules Verne Society, he served as its Vice President from 2000 to 20008. Walter has produced many media programs, articles, reviews, and papers on aspects of Jules Verne and has collaborated on translations and scholarly editions of three Verne novels: *The Meteor Hunt*, *The Mighty Orinoco*, and a special edition of *20,000 Leagues Under the Seas* for the U.S. Naval Institute in Annapolis. Known to friends as Rick Walter, he lives in Albuquerque, New Mexico.

Shipwrecked Family: Marooned with Uncle Robinson Jul 20 2021 Volume 2 of the Palik Series, published in conjunction with the North American Jules Verne Society *Marooned With Uncle Robinson Castaway* by pirates on a deserted island Without tools or supplies to survive A mother and her children have only a kindly old sailor to help. But what explains the strange flora and fauna they find on the isle? The second volume in the Palik series, presented by the North American Jules Verne Society, offers another story never before published in English. *Shipwrecked Family* was rejected by Verne's publisher, so rather than finish it, he rewrote it with new characters. That book became the classic *The Mysterious Island* in which Captain Nemo made his last appearance. Presented here is Verne's original draft of that novel—one which is very different from the book that it eventually became. Expert translation is provided by Sidney Kravitz, also translator of the definitive modern edition of *The Mysterious Island*. Translated by Sidney Kravitz; Introduction by Brian Taves. This series is published in conjunction with the North American Jules Verne Society, najvs.org.
