A Fourth Innings with Cardus Mar 04 2020 In this, another collection of classic cricket writing by Sir Neville Cardus, he urges that the game itself is more important than winning, players should fully express themselves in the game and he writes about those players who delight the senses: Hurst and Hutton, McCabe and Compton. There are essays on the Indians, West Indians and the 1948 Australians who Cardus considered the best team ever to visit England. An outstanding article describes an innings by Compton that he believed to be 'champagne for the connoisseur, ginger pop for the boys'.

The Parliamentary Debates from the Year 1803 to the Present Time Apr 28 2022

Death Before Glory Jun 26 2019 Death Before Glory! is a highly readable, thoroughly researched and comprehensive study of the British army's campaigns in the West Indies during the French Revolutionary and Napoleonic period and of the extraordinary experiences of the soldiers who served there. Rich in sugar, cotton, coffee and slaves, the region was a key to British prosperity and it was perhaps even more important to her greatest enemy France. Yet, until now, the history of this vital theatre of the Napoleonic Wars has been seriously neglected. Not only does Martin Howard describe, in graphic detail, the entirety of the British campaigns in the region between 1793 and 1815, he also focuses on the human experience of the men the climate and living conditions, the rations and diet, military discipline and training, the treatment of the wounded and the impact of disease. Martin Howard's thoroughgoing and original work is the essential account of this fascinating but often overlooked aspect of the history of the British army and the Napoleonic Wars.

Sea of Grey Dec 01 2019 Captain Alan Lewrie returns in Dewey Lambdin's tenth roaring adventure on the high seas. This time, it's off to a failing British intervention on the ultra-rich French colony of Saint Domingue, wracked by an utterly cruel and bloodthirsty slave rebellion led by Toussaint L'Ouverture, the future father of Haitian independence. Beset and distracted though he might be, it will take all of Lewrie's pluck, daring, skill, and his usual tongue-in-cheek deviousness, to navigate all the perils in a sea of grey. "The lively pace and white-knuckle battle scenes should make this another winner with Lambdin's fans." - Publishers Weekly

The Politics of Reproduction Feb 01 2020 Many British politicians, planters, and doctors attempted to exploit the fertility of Afro-Caribbean women's bodies in order to ensure the economic success of the British Empire during the age of abolition. Abolitionist reformers hoped that a homegrown labor force would end the need for the Atlantic slave trade. By establishing the ubiquity of visions of fertility and subsequent economic growth during this time, The Politics of Reproduction sheds fresh light on the oft-debated question of whether abolitionism was understood by contemporaries as economically beneficial to the plantation colonies. At the same time, Katherine Paugh makes novel assertions about the importance of Britain's Caribbean colonies in the emergence of population as a political problem. The need to manipulate the labor market on Caribbean plantations led to the creation of new governmental strategies for managing sex and childbearing, such as centralized nurseries, discouragement of extended breastfeeding, and financial incentives for childbearing, that have become commonplace in our modern world. While assessing the politics of reproduction in the British Empire and its Caribbean colonies in relationship to major political events such as the Haitian Revolution, the study also focuses in on the island of Barbados. The remarkable story of an enslaved midwife and her family illustrates how plantation management policies designed to promote fertility affected Afro-Caribbean women during the late eighteenth and early nineteenth centuries. The Politics of Reproduction draws on a wide variety of sources, including debates in the British Parliament and the Barbados House of Assembly, the records of Barbadian plantations, tracts about plantation management published by doctors and plantation owners, and missionary records related to the island of Barbados.

The Parliamentary Register; Or, History of the Proceedings and Debates of the House of Commons [and House of Lords] Containing an Account of the Most Interesting Speeches and Motions Mar 16 2021

British Battles of the Napoleonic Wars, 1793-1806 Aug 28 2019 The Napoleonic Wars was truly a world-wide conflict and Britain found itself engaged in battles, sieges and amphibious operations around the globe. Following every battle the commanding officer submitted a report back to the Admiralty or the War Office. Presented here together for the first time are those original despatches from some forty generals, captains and admirals detailing more than eighty battles that took place in India, Africa, Europe and the Americas. This unique collection of original documents will prove to be an invaluable resource for historians, students and all those interested in what was one of the most important periods in British military and naval history. The reports include those from some of Britain's most famous battles, the likes of Trafalgar and Waterloo, as well as less well-known but just as important engagements which resulted in the capture of the islands and territories which helped form the greatest empire the world has ever known.

A Letter to the Right Hon. Earl Grey on the West India Question Nov 04 2022
By Fire and Bayonet Sep 29 2019 There have been few books about Grey's glorious (but ultimately ill-fated) West Indies campaign in the early years of the long and terrible wars of 1793-1815, yet five of the subalterns in Grey's expeditionary force went on to command divisions in Wellington's Peninsula army; another two commanded the Iron Duke's Royal Artillery; and one (Richard Fletcher) - famously - the Royal Engineers. The tactics used by Sir Charles Grey were as far removed as can be imagined from the traditional image of the two-deep British line delivering massed volleys at pointblank range. The invasions of Martinique, St Lucia and Guadeloupe were raids undertaken by Special Forces, who were instructed to operate in open order, in silence and at bayonet-point; all attacks went in with unloaded muskets. Most of the heavy-duty fighting was undertaken by converged flank battalions, grenadiers and light infantrymen - assembled under hand-picked field officers and used as stormtroopers in every major assault; here were French revolutionary war tactics that are largely unexplored and largely undocumented (at least in modern times). Sir Charles Grey was one of the most aggressive British generals of the era - something his gentlemanly appearance and demeanor did not immediately indicate. Ever cheerful and optimistic - and humane and loyal to his friends - his ability to deliver needle-sharp assaults and then harry a defeated enemy (the latter being something at which British generals of the Napoleonic era were distinctly mediocre) makes him one of the more interesting personalities of the early

portion of the 'Great War with France'. If he was not ultimately unsuccessful, it was not his fault: he was robbed of the resources he needed at the outset; then given virtually no reinforcements by Horse Guards. The great killer on this campaign was not the French... it was disease: principally, Yellow Fever. Of the 6,200 men who landed with Grey on Martinique in February 1794, some 4,100 were dead by Christmas - such then is *By Fire and Bayonet* an account of a very dramatic period for the British Army in the West Indies. It took many years to learn the lessons presented by the campaign, but for the young officers who survived, it provided some invaluable lessons that were put to good use 15 or 20 years later in the British Army of a later era.
