**Understanding Governance in South Asia** Aug 07 2020 The concept of good governance in South Asia poses a challenge at the implementation level, mainly due to ethnocentricity, regional disparities, division between poor and rich, and rural and urban division among the people. Concepts such as decentralization, citizen engagement, lean public service, privatization, autonomy, public-private partnership may work well in developed countries but may not produce the same results in the region where the majority of poor people expect their government to fulfill their basic needs. Governance in South Asia needs to be reformed to ensure that poverty can be reduced, if not completely eradicated. Poor governance and the various means by which governance has fallen short, has led to lack of development and continuance of poverty in South Asian societies. South Asian countries have more or less similar objectives, structures, value systems, cultures, and standards of governance despite different forms of government. The colonial legacy of British administrative system had its impact on centralization. Secrecy, elitism, rigidity, and social isolation is common to all South Asian countries. The post-colonial administrative system is built upon pre-colonial administrative traditions throughout the region. These countries can learn from each other's experiences. They need to develop an indigenous model to find pragmatic solutions to the challenges of good governance. This book argues that countries in South Asian can achieve good results through good governance if they develop and adopt an indigenous model rather than simply borrowing models and ideas from the West. Please note: This title is co-published with Manohar Publishers, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

**Communities in Action** Dec 11 2020 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Taiwan's Politics In Action: Struggling To Win At The Ballot Box Sep 27 2019 Taiwan's Politics in Action: Struggling to Win at the Ballot Box is about the most interesting and exciting aspects of Taiwan's politics: political competition in the form of electioneering, campaigns and voting. The author first analyzes the theories, constructs or simply ideas about elections, especially who wins them and why. The most discussed by the pundits and the scholars are the watermelon and the pendulum theory: voting as before or not. The economic, or pocketbook, theory is also popular — although whether this means economic growth or greater equity has changed. Which party or candidate has the most money is also predictive. Other constructs or simply ideas are also commonplace. Divide and conquer is another approach. Another is the best campaign agenda; so too picking the most attractive candidates. Professionalism in campaigning and the use of social media are also favorite ideas. So is the appeal to voters' ethnicity, espousing liberal or conservative ideas, using protest, focusing on constant concerns such as peace and corruption and finally, the appeals of populism and progressivism. The author then examines Taiwan's two most recent elections, the 2018 mid-term (or collection of local elections) and the 2020 national presidential and legislative election to apply the theories. The Nationalist Party or Kuomintang (KMT) won the former; the Democratic Progressive Party (DPP) won the latter, giving the observer a choice of evidence about how to win. The author concludes that Taiwan's democracy is being challenged, but is still popular in spite of strong external forces and other worries.

The Complete Married With Children Book: TV's Dysfunctional Family Phenomenon Nov 09 2020 Married . . . with Children premiered on Fox TV in 1987 and updated the Don Ameche and Frances Langford radio comedy series, The Bickersons, and Jackie Gleason's TV classic, The Honeymooners, with a raunchy, cutting-edge slant that focused on a lovable yet laughable family headed by endearingly flawed Al (Ed O'Neill), his housework-hating wife, sexy daughter, and randy son. **White Fragility** Jul 06 2020 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly

illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

**Teaching Outside the Box** Mar 02 2020 In its totality, this book explores subjects that are rarely available in primary literature publications and brings diverging fields together that are generally addressed separately in specialty journals. The book argues that past school failures are instructive. The author identifies the structural and emotional triggers that make it difficult for educators’ to overcome the social constructs that control the progress of Black students, reproduce inequities, subvert the socio-economic progress of the nation, and threaten the legitimacy of the U.S. public school system. One failure is informative; successive school failures are chock-full of must avoid school policies and instructional practices. The book analyzes the lessons learned from a list of school-imposed policies that have molded and determined the academic progress of Black students. The author argues that much can be discerned from that which undermined the performance of schoolteachers’ and public school systems. The quantifiable outcomes of past school practices can better inform educators and future teachers and school leaders. The book carefully analyzes the organic evolution of educators’ social constructs that regenerated inequities to reveal the road map for rebuilding genuinely inclusive and equitable public school systems that serve the interests of students and society. The book also provides in-depth analysis of various disciplines that identify the best methodologies to improve the teaching and learning of Black students, homeless students, and all other students. The book aims to offer a unique perspective by carefully unfolding the built in school structures that obstruct the abilities of school administrators and teachers to bridge the student achievement gaps and meet the objectives of consecutive school reform initiatives. The author’s distinctive approach stimulates the thinking of the entire field of education, and challenges accepted propositions commonly assumed about African American students. In short, this book offers a perspective that is rarely shared or understood by educators and practitioners in the field of education.

City of Screens May 04 2020 In City of Screens Jasmine Nadua Trice examines the politics of cinema circulation in early-2000s Manila. She traces Manila's cinema landscape by focusing on the primary locations of film exhibition and distribution: the pirated DVD district, mall multiplexes, art-house cinemas, the university film institute, and state-sponsored cinematheques. In the wake of digital media piracy and the decline of the local commercial film industry, the rising independent cinema movement has been a site of contestation between filmmakers and the state, each constructing different notions of a prospective, national public film audience. Discourses around audiences become more salient given that films by independent Philippine filmmakers are seldom screened to domestic audiences, despite their international success. City of Screens provides a deeper understanding of the debates about the competing roles of the film industry, the public, and the state in national culture in the Philippines and beyond.
