*Rocket Surgery Made Easy* Jun 07 2020 It's been known for years that usability testing can dramatically improve products. But with a typical price tag of \$5,000 to \$10,000 for a usability consultant to conduct each round of tests, it rarely happens. In this how-to companion to *Don't Make Me Think: A Common*

Sense Approach to Web Usability, Steve Krug spells out a streamlined approach to usability testing that anyone can easily apply to their own Web site, application, or other product. Using practical advice, plenty of illustrations, and his trademark humor, Steve explains how to: Test any design, from a sketch on a napkin to a fully-functioning Web site or application Keep your focus on finding the most important problems (because no one has the time or resources to fix them all) Fix the problems that you find, using his "The least you can do" approach By paring the process of testing and fixing products down to its essentials ("A morning a month, that's all we ask"), *Rocket Surgery Made Easy* adds demonstration videos to the proven mix of clear writing, before-and-after examples, witty illustrations, and practical advice that made *Don't Make Me Think* so popular.

*FRCS* Dec 26 2021 There is a need for a concise revision guide for the FRCS General Surgery Intercollegiate exam, and this is such a book, serving as a companion for the trainee throughout the course of their six-year training rotation. It reflects the exact framework of the exam syllabus issued by the Joint Committee on Higher Surgical Training (JCHST), and contains the most recently amended guidelines. The question and answer style used is a popular and effective method which lends itself perfectly to studying either alone or as a group, wherein one acts as examiner and the other as candidate. Further, the exam is very clinically orientated, with vivas based on a clinical scenario, using patients and images as method of initiating clinical discussion. This book will act as supplementary reading for any course relating to the FRCS exit examination in general surgery. Both the authors and main contributors have passed the FRCS exam in general surgery and have many years experience in postgraduate medical education.
