*ASTM Masonry Standards for the Building Industry* Dec 26 2021 "This compilation is sponsored by ASTM International's Committee C12 on Mortars and Grouts for Unit Masonry, and Committee C15 on Manufactured Masonry Units. It contains specifications for products such as mason's lime, concrete brick, building brick and hollow brick (clay or shale), paving brick, facing brick, glazed brick, hollow and solid load-bearing concrete masonry units, masonry cement, facing tile, Portland cement, mortar, grout, concrete paving units, segmental retaining wall units, and prefabricated masonry panels. Test methods for sampling and testing brick, structural clay tile, concrete masonry units, mortar, and grout are also included, as well as methods for measuring drying shrinkage of concrete block, bond strength of mortar to unit masonry, splitting tensile strength of masonry units, masonry flexural bond strength, and water penetration and leakage. Practices and guides address test specimen preparation, proper use of test methods and specifications, and reduction of efflorescence. Also included are specifications for ancillary materials used in masonry construction"--

**Brick and Block Masonry - From Historical to Sustainable Masonry** Jul 01 2022 Brick and Block Masonry - From Historical to Sustainable Masonry contains the keynote and semi-keynote lectures and all accepted regular papers presented online during the 17th International Brick and Block Masonry Conference IB2MaC (Kraków, Poland, July 5-8, 2020). Masonry is one of the oldest structures, with more than 6,000 years of history. However, it is still one of the most popular and traditional building materials, showing new and more attractive features and uses. Modern masonry, based on new and modified traditional materials and solutions, offers a higher quality of life, energy savings and more sustainable development. Hence, masonry became a more environmentally friendly building structure. Brick and Block Masonry - From Historical to Sustainable Masonry focuses on historical, current and new ideas related to masonry development, and will provide a very good platform for sharing knowledge and experiences, and for learning about new materials and technologies related to masonry structures. The book will be a valuable compendium of knowledge for researchers, representatives of industry and building management, for curators and conservators of monuments, and for students.
