Relocation of Economic Activity Oct 24 2021 This timely volume provides a thorough analysis of current trends in location and relocation of economic activity globally, regionally and locally. Using robust empirical material this book offers a multidisciplinary, comprehensive overview, critique and extension of long-established theories underpinning patterns of firm (re)location. It explores dominant trends in the mobility and relocation of industries and firms, examines the factors guiding such trends and evaluates their consequences in both developed and emerging economies in Europe, Asia and Latin America. This book will be appreciated by diverse

audiences. Geography and regional science researchers of 'economic activity location' can engage with the critical appraisal of key theoretical concepts and an analysis of recent empirical data. Students of human and economic geography, planning, regional development, and global supply chain management in senior years of undergraduate programmes and completing postgraduate degrees will appreciate the accessible language, multiple examples and graphical illustrations of the theoretical frameworks underpinning location and relocation of firms and industries, and its consequences. Practitioners, including local and regional policy makers and location consultants will enjoy the comparative discussion of solutions and practices adopted in localities, regions and countries as diverse as China, Brazil, The Netherlands and Poland.

The Art of Experimental Economics Apr 17 2021 Applying experimental methods has become one of the most powerful and versatile ways to obtain economic insights, and experimental economics has especially supported the development of behavioral economics. The Art of Experimental Economics identifies and reviews 20 of the most important papers to have been published in experimental economics in order to highlight the power and methods of this area, and provides many examples of findings in behavioral economics that have extended knowledge in the economics discipline as a whole. Chosen through a combination of citations, recommendations by scholars in the field, and voting by members of leading societies, the 20 papers under review – some by Nobel prize-winning economists – run the full gamut of experimental economics from theoretical expositions to applications demonstrating experimental economics in action. Also written by a leading experimental economist, each chapter provides a brief summary of the paper, makes the case for why that paper is one of the top 20 in the field, discusses the use made of the experimental method, and considers related work to provide context for each paper. These reviews quickly expose readers to the breadth of application possibilities and the methodological issues, leaving them with a firm understanding of the legacy of the papers' contributions. This text provides a survey of some of the very best research in experimental and behavioral economics and is a valuable resource for scholars and economics instructors, students seeking to develop capability in applying experimental methods, and economics researchers who wish to further explore the experimental approach.
